### **Planning**

Planning means looking ahead. It is deciding in advance what is to be done. Planning includes forecasting. According to Koontz O'Donnel - "Planning is an intellectual process, the conscious determination of courses of action, the basing of decisions on purpose, acts and considered estimates"

### **Nature of Planning:**

- 1. Planning is goal-oriented: Every plan must contribute in some positive way towards the accomplishment of group objectives. Planning has no meaning without being related to goals.
- 2. Primacy of Planning: Planning is the first of the managerial functions. It precedes all other management functions.
- 3. Pervasiveness of Planning: Planning is found at all levels of management. Top management looks after strategic planning. Middle management is in charge of administrative planning. Lower management has to concentrate on operational planning.

### (BBA COURSE)

- 4. Efficiency, Economy and Accuracy: Efficiency of plan is measured by its contribution to the objectives as economically as possible. Planning also focuses on accurate forecasts.
- 5. Co-ordination: Planning co-ordinates the what, who, how, where and why of planning. Without co-ordination of all activities, we cannot have united efforts.
- 6. Limiting Factors: A planner must recognize the limiting factors (money, manpower etc.) and formulate plans in the light of these critical factors.
- 7. Flexibility: The process of planning should be adaptable to changing environmental conditions.
- 8. Planning is an intellectual process: The quality of planning will vary according to the quality of the mind of the manager.

#### **Importance of Planning:**

- 1. To manage by objectives: All the activities of an organization are designed to achieve certain specified objectives. However, planning makes the objectives more concrete by focusing attention on them.
- 2. To offset uncertainty and change: Future is always full of uncertainties and changes. Planning foresees the future and makes the necessary provisions for it.
- 3. To secure economy in operation: Planning involves, the selection of most profitable course of action that would lead to the best result at the minimum costs.
- 4. To help in co-ordination: Co-ordination is, indeed, the essence of management, the planning is the base of it. Without planning it is not possible to co-ordinate the different activities of an organization.
- 5. To make control effective: The controlling function of management relates to the comparison of the planned performance with the actual performance. In the

# (BBA COURSE)

absence of plans, a management will have no standards for controlling other's performance.

6. To increase organizational effectiveness: Mere efficiency in the organization is not important; it should also lead to productivity and effectiveness. Planning enables the manager to measure the organizational effectiveness in the context of the stated objectives and take further actions in this direction.
